Laboratory/Clinical Research Experience:

- 1995-96 - **Research, Ecotoxicology**, Inter American University of Puerto Rico, San German Campus
I wrote a research paper on the detrimental effects of pesticides, herbicides, fertilizers, their incorporation into organisms of different trophic levels, with emphasis on their negative impact in human health.
- 1996-97 - **Research, Evolutionary Differentiation**, Inter American University of Puerto Rico, San German Campus.
Using quantitative and qualitative procedures, I measured the physical characteristic variations and color of the lizard, Anolis Cristateleus, found in the mountainous tropical forest versus the coastal lowlands of Puerto Rico. Found phenotypic differences to be statistically significant depending on the location.
- 1997-98 - **Research, Physiology population densities**, Inter American University of Puerto Rico, San Germán Campus.
I conducted field research on three shrimp species endemic to Puerto Rico rivers. I compared two different island headwater population densities versus water contaminants found in each.
- 1998-99 – **Research, Diabetic Neuropathy: Nitric oxide effects on the peripheral nervous system**. University of Puerto Rico, Medical Science Campus.
An extensive literature research among a group of 8 investigators, analyzing the role played by nitric oxide on the peripheral nervous system (PNS) and how the metabolism of this compound is affected by the high blood glucose levels seen in diabetes.
- 2000-01 - **Research, Arnold Chiari Type I Malformations Case Reports on 27 Patients**, In collaboration with Dr. Jose Dones, Dr. Orlando De Jesus, Dept. of Neurosurgery, University of Puerto Rico
- 2000-01 - **Research, Trials to Influence the Healing of Incised Cerebral Wounds by Administration Of Antireticular Cytotoxic Serum**, in collaboration with the Department of Neurosurgery. University of Puerto Rico.

Analysis of effects of ACS on cerebral wound healing.
- 2003-05 - **Research, Gene Therapy and Radiation of Malignant Glioma by Targeting Glioma Specific Lactate Transporter** in collaboration with Saroj Mathupala, Ph.D, Andrew Sloan, M.D., Dept. of Neurosurgery, Wayne State University
Established the in-vitro and in-vivo therapeutic efficacy of anti-monocarboxylate Transport (anti-MCT) therapy to treat gliomas. Concluded that anti-MCT therapy when combined with low-dose irradiation is a valuable adjunctive therapy in treating gliomas.

Dissertations:

- 1997-98 - **Cloning - Techniques and Ethics**, Senior Honors Thesis, Inter American University Library. San Germán, Puerto Rico
I wrote a paper and gave a conference on the different techniques used in animal cloning and their possible application to human cloning. I also presented the ethical dilemmas that are involved in cloning, specifically human cloning. **(unpublished)**
- 2003-05 - **Gene Therapy and Radiation of Malignant Glioma by Targeting Glioma**

Specific Lactate Transporter, Doctoral Thesis, Tumor Physiology, Dept. of Neurosurgery, Wayne State University (**published**)
